

to report on any important design or work, or on any serious accident or threatened danger to any works, or on any calamity, actual or anticipated, the remedy for which may appear to be within the range of engineering skill.

31. Detailed reports of all his inspections shall be drawn up by the Inspector of Local Works for the information of the Commissioners, and a copy thereof, so far as may relate to a particular district, shall be forwarded by him to the District or Local Board concerned through the Magistrate of the District.

32. Although the detailed designs and estimates for works will commonly be prepared by District Engineers, the arrangement and general plan of all important works should be concerted with the Inspector of Local Works, who will be responsible for the engineering character of every project that he passes on with his approval. The Inspector of Local Works may, if he see fit, himself prepare the designs for any work in his division. He will communicate freely and personally on all professional matters with District Engineers, and afford them the benefit of his advice in the performance of their duties.

33. The Inspector of Local Works will, in submitting to the Commissioner any reports, plans, estimates or other documents relating to the works of District Boards, invariably state his own opinion as to the suitability of the designs and reasonableness of the rates. He must also check the calculations in detail of all estimates and compare the quantities in the estimates with those shown on the drawings. If projects are sent up by District Boards without proper information, he will return them for such further information as the case may need.

34. The Office of the Inspector of Local Works will be located in the same place as that of the Commissioner of the Division, and he will correspond direct with District Boards regarding all matters in which he exercises powers assigned to him by these rules.

Mode of preparation and submission of plans, designs, specifications, and estimates for works for approval and sanction.

35. All estimates and projects for the construction or repair of buildings, roads, bridges, and other public works undertaken by District and Local Boards shall be classed under one or other of the two heads *Repairs* or *Original Works*, and shall be prepared in the forms prescribed in the Public Works Department Code, Volume I, Chapter VII (*fifth edition*), and submitted for the sanction of the District or Local Board in meeting. Estimates for *Repairs* shall include all operations required to maintain works in proper condition, and estimates for *Original Works* all those which do not come under the classification of repairs.

36. The cost of every survey or preliminary operation other than those which can be carried out by the paid district establishment shall be considered to be an "original work," and shall be covered by a sanctioned estimate and a specific assignment of funds.

37. A revised estimate shall be prepared immediately there is reason to anticipate that an estimate will be exceeded by more than 10 per cent. of its total amount, or where considerable alterations of the original estimate are desired, and it shall be submitted for the approval of the authorities whose sanction would be necessary if it were an original estimate.

38. In the case of all works of importance, the District Engineer shall submit a rough design for the approval of the Inspector of Local Works before preparing the detailed drawings and estimates.

39. All sanctions given by the District or Local Boards shall be formally recorded in their proceedings.

40. Except in case of emergency, or to prevent damage or loss, no work shall be put in hand until an estimate for carrying it out has been sanctioned; and no proposal for the execution of any work shall be sanctioned by a District or Local Board, unless it be accompanied by a properly detailed estimate, and, when necessary, by properly prepared drawings showing fully the work proposed.

41. In the case of the following classes of estimates or projects, the sanction of the District or Local Board shall be provisional only, and subject to the confirmation and approval of the authority indicated:—

- (a). All projects for new works, the estimated cost of which amounts to Rs. 25,000, or more ... Sanction of the Local Government in the Public Works Department to be obtained through the Inspector of Local Works and Commissioner of the Division.
- (b). All projects for works which may affect or alter the course of any river which is navigable at any time of the year, or on either bank of which there is any public embankment ...
- (c). All projects for embanked roads passing through country subject to floods or irrigated from canals ...
- (d). All estimates for new works or repairs, the amount of which is Rs. 5,000, or more ... Sanction of the Commissioner of the Division to be obtained through the Inspector of Local Works.
- (e). All estimates for expenditure under the provisions of section 79 of the Act except the planting of trees on the sides of roads ...

When the sanction of the authority indicated is received, the provisional sanction of the District or Local Board shall be confirmed by a resolution to be formally recorded in their proceedings, and the execution of the work may thereafter be proceeded with in accordance with any provision that may be made for it in the budget of the year.
